# VOIPBOX BRI

# VoIP gateway for up to 8 BRI interfaces

- 4/8/16 channel ISDN BRI VoIP gateway
- Toll-grade voice compression and T.38 fax support
- Integrated SIP server for remote survivability and emergency break-out
- Advanced Least Cost Routing
- QoS and traffic-shaping support
- PSTN backup (lifeline support)
- Supports auto-provisioning and centralized system management

# Migrate to VoIP and protect your investment

The VoIPBOX BRI provides you with a complete features suite to meet all your requirements from the latest VoIP media gateway technology. The TELES VoIPBOX BRI enables service providers focusing on business customers to offer an attractive business trunking service while protecting the customer investment in existing ISDN PBX. Customers who have already made the decision to use IP PBX can continue to use their existing ISDN phones whilst protecting their investment and maintaining the same user experience with the former PBX.

## Excellent voice quality from a feature rich product

Using top quality DSP technology we provide our customers with high voice quality. Even when using voice compression to save network bandwidth, customers using low band infrastructure can benefit from sophiticated RTP multiplexing. An integrated call back server, SIP registrar, ISDN clear channel as data relay, and DSL router are just a few of the features provided as part of the standard feature set.

### LCR savings and secure back-up

Save money on every phone call using the VoIPBOX BRI LCR (Least Cost Routing) feature which automatically identifies the least expensive route to each destination, whether it is over a standard fixed-line network or over the Internet. If required, AOC (Advice of Charge) generation can be used to support customer or legal requirements.

### Remote survivability

Besides superior voice quality, the VoIPBOX BRI acts as a SIP registrar and location server, enabling SIP devices to register on the box and maintain service even when the IP network is not available.

### Simple installation and sophisticated management

TELES VoIPBOX BRI is supported with multiple management and provisioning tools to meet the requirements of multiple customers' profiles. Using the installation wizard, customers will soon have the service up and running smoothly. The comprehensive WEB management system enables you to perform all management and maintenance tasks easily. TELES field proven NMS system enables customers with a large install base to simultaneously perform management and provisioning tasks on multiple boxes.

# VoIPBOX BRI

# CAPABILITIES

Scalability	4/8/16 concurrent calls
	Up to 8 BRI
VoIP codecs	G.711, G.723, G.726, G.728, G.729, GSM, iLBC
Fax support	T.38, fallback to G.711
Echo cancellation	G.168–2002, 128 ms tail length
ISDN data call	Clear channel (RFC 4040)
DTMF	RFC 2833, SIP/H.323 info, inband
VoIP quality	Configurable ToS, Diffserv, VLAN
	Silence suppression, VAD, CNG
	QoS alternative routing based on ASR,
	fraction lost, jitter, and roundtrip delay.
	Traffic shaping
	Dynamic PSTN fallback (IntraStar patent)
Call routing	Time-dependent routing
	Multilevel alternative routing
	5000 routing entries
	ENUM support
	Database managed routing
	Support for multiple gatekeepers, H.225 (v4)
	Support for multiple registrars
	Overlap/en-bloc conversion RFC 3578
	Digit manipulation
	Black/white list
Advanced	Integrated SIP registrar and location server
	Life line functionality: continuous PBX to PSTN
	connectivity in case of power failure
	AOC generation (AOC-D, AOC-E)
	Support for call forwarding
	(ISDN–SIP interworking)
	Integrated callback/two-stage-dialing server
	Integrated DSL router (PPPoE)
	RTP multiplex bandwidth reduction
	STUN client
	Symmetric RTP (COMEDIA)
	Radius support
PROTOCOLS	

# ISDN DSS1 (Q.931, national variants), Q.SIG-BC TE/NT, PP/PMP VoIP SIP (RFC 3261) H.323 (v4)

# SYSTEM MANAGEMENT

Remote access via IP or ISDN data call with TELES NMS	
or GATE Manager	
Web-based management	
Installation wizard	
SNMP (alarm management)	
Call Detail Records (CDRs)	

# CONNECTION SPECIFICATIONS

ISDN	2/4/8×BRI, RJ-45	
	configurable as TE or NT	
Ethernet	2 × Ethernet 10/100 Base-T RJ-45	

## PHYSICAL PARAMETERS

Size (W×H×D)	280 mm × 38 mm × 138 mm
Material	ABS
Mounting	Desktop, Wall
Power supply	Wall power supply, 12 VDC, 1.6 A

# ENVIRONMENTAL CONDITIONS

Temperature	+5°C to +40°C
Humidity	5 % to 80 % (non-condensing)

# CERTIFICATES

EMC, Safety, CE
